## SNIPER® Flashlight/Laser With Integrated Fore Grip Instruction Manual.

### WARNING

Check list before using Flashlight/Laser Integrated Foregrip.

- Direct view to the Laser beam can cause permanent eye damage. **DO NOT** attempt to view the laser beam or point at human eyes.
- Always follow Firearms Safety Procedures and Local firearms laws and regulations.**
- Do not** point laser beam toward any aircraft, public transportation or other objects with safety matters. To do so may be subject to felony charge.
- Do not** point laser beam at humans or animals that might result eye injury or damage.
- Do not** leave lighted flashlight unattended. It will produce significant heat while turned on.
- Do not** point flashlight at any combustible material or other material considered flammable.
- Do not** attempt to hold or touch bezel or lens of lighted flashlight.
- To prevent accidental activation of flashlight, it is wise to remove batteries out of compartment during transportation, driving, or long periods of storage.
- Confirm on/off stroke button is off when it is not in use.
- Batteries have been charged by manufacturer. **Do not recharge. These are not rechargeable batteries.**
- Do not** touch lamp of flashlight during or after operation. It will generate high heat and temperatures.

\*\*\* All flashlights use only battery model number: CR123A, 3 volt. Non rechargeable.

### Flashlight Battery Installation (Apply to all models)

- Remove flashlight compartment cover by turning it counter-clockwise.
- Read batteries sign on lower portion of main body. Observe the battery orientation. Install batteries <+> sign face up into the compartment.
- Attach compartment cover back by turning clockwise until secure.
- Model of GPFL01, GPRL01, and GPGL01 will use CR123A, 3 volts batteries.

### Flashlight Operation - for GPFL01, GPRL01 and GPGL01

It is wise to read the warning section of this manual first before operating flashlight functions.

1. Press on/off strobe button once firmly to hear click to lock in position. In this first level, flashlight will remain on.
2. Press again to turn it off.
3. Press again firmly after step 2, the flashlight will be in strobing flashlight state.
4. Press again to turn it off.
5. Half press the on/off strobe button once, flashlight will remain on but not lock in. Release the button will turn off flashlight.
6. Half press the on/off strobe button after step 5, the flashlight will strobe the flashlight light source. Release the button it will turn off.

### Green/Red Laser Operation - for GPRL01 and GPGL01

Laser doesn't need batteries installed. It shares batteries with the flashlight.

- Press on/off button once hearing "click" to turn laser on.
- Press on/off button again hearing "click" to turn laser off.
- Half press on/off button without hearing "click" will turn on laser but not lock in. Release the button to turn off laser.

### Mount Grip to Picatinny/ Weaver System Rail

- Loosen adjusting knob to attach fore grip to desire position of mounting rail.

### Maintenance and Storage Tips, Advice, and Suggestion

- Always replace a set of batteries together.
- Using recommended type and model number of batteries.
- Using rechargeable batteries is wise practice to protect your new investment.

**Mixed use of non-chargeable and rechargeable might damage your device.**

- Never short circuit batteries. Such action will rise significant temperature that might cause batteries life and energy loss.
- Remove batteries from device's compartment when carrying in car/truck or driving.
- Keep battery compartment clean.
- Keep metallic objects away from batteries.
- It is dangerous to disassemble, short circuited, and expose lithium batteries to water, fire, or high temperatures will cause serious explosion and serious damage.
